Arc-Tech is looking for a positive and motivated individual with qualifications and experience in electrical installation and Solar PV. The role will involve installing domestic to large-scale commercial PV systems for our clients.

Job Description

- Assist and work as a team in the roof installation of the solar panels
- Ensure installations are completed in a timely and cost effective manner and to a high standard
- Assist on all roofing aspects of domestic and commercial surveys and design.
- Assist with the installation of other technologies including battery storage, EV charging points, LED lighting, voltage optimization and other related technologies.
- Must be physically able to complete manual handling and lifting of materials to the desired area
- Support the lead electrician on site by running cables, mounting inverters and completing other task when requested
- Keep work area clean and tidy at all times
- Maintain all tools and equipment
- Ensure compliance with the Health and Safety of the company.

Experience Essential

- Experienced roofing labourer with extensive experience in working at heights and manual handling
- Experience of installing PV mounting system of various types, including but not limited to retro-fit, flat roof, ballast, standing seam, in-roof, ground mount etc.

Skills & Qualifications Essential

- Highly organised
- Clear headed under pressure
- Training in working at heights
- CSCS (or ECS) Card Held

Job Vacancy

Essential

- Proven ability to work with own initiative, as part of a team and/ or lead a team
- Proven track record in working with customers and on construction sites
- Proactive attitude to problem solving
- Enthusiasm and understanding of renewable energy.
- Able to work a range of hours with occasional overnight stays
- Full driving license
- Legal right to work in the UK
- Fully fit and able to work at height
